**Case #:** ZBA 2019-86 **Date:** September 18, 2019

**Recommendation:** Conditional Approval

#### PLANNING STAFF REPORT - ZBA

Site: 18 Glendale Avenue

**Applicant Name:** Ji Shi & Yan Zhao

Applicant Address: 355 Walnut Street, Unit A, Newton, MA

02460

Owner Name: Ji Shi

Owner Address: same as applicants

City Councilor: Katjana Ballantyne

<u>Legal Notice:</u> (re-advertised) Applicant, Ji Shi, and Owners, Ji Shi & Yan Zhao, seek special permits under §4.4.1 of the

Dates of Public Hearing(s): September 18, 2019 – ZBA

\*After receiving an updated site plan, it has been determined that the dorm-ette is not located within the left side yard setback. It is set back beyond the 8 foot setback required in the RB zone. Therefore, **no relief** is required for the installation of the dorm-ette.

**1.** <u>Subject Property:</u> The locus presents a legally pre-existing two-family, 2 ½-story structure in the RB zoning district. The property is one of a series of similarly designed, 2 ½-story gable-fronted structures along Glendale Avenue. This structure resides on a 2,475 square-foot lot.

Date: September 18, 2019 Case #: ZBA 2019-86 Site: 18 Glendale Avenue

- **2.** <u>Proposal:</u> The applicant proposes a complete overhaul of the property. The triggers for special permitting are as follows:
  - Construct a dormer within the right side yard setback (special permit)
  - Extend the left elevation roofline to cover the existing 3<sup>rd</sup> floor rear deck area (**special permit**)

The Applicant is removing all bituminous material from the property and re-landscaping the entirety of the parcel.

#### 4. Green Building Practices:

None listed on application.

## II. FINDINGS FOR SPECIAL PERMIT (SZO §4.4.1)

In order to grant a special permit, the SPGA must make certain findings and determinations as outlined in §4.4.1 of the SZO. This section of the report goes through §4.4.1 in detail.

#### 1. Information Supplied:

Staff finds that the information provided by the Applicant conforms to the requirements of §4.4.1 of the SZO.

2. <u>Compliance with Standards:</u> The Applicant must comply "with such criteria or standards as may be set forth in this Ordinance which refer to the granting of the requested special permit."

#### Section 4.4.1 of the SZO

Section 4.4.1 states that "[l]awfully existing nonconforming structures other than one- and two-family dwellings may be enlarged, extended, renovated or altered only by special permit authorized by the SPGA in accordance with the procedures of Article 5. The SPGA must find that such extension, enlargement, renovation or alteration is not substantially more detrimental to the neighborhood than the existing nonconforming building. In making the finding that the enlargement, extension, renovation or alteration will not be substantially more detrimental, the SPGA may consider, without limitation, impacts upon the following: traffic volumes, traffic congestion, adequacy of municipal water supply and sewer capacity, noise, odor, scale, on-street parking, shading, visual effects and neighborhood character."

#### Left side yard setback

The RB zone requires a left side yard setback of 8 feet. The existing left side yard setback is 4 feet. The applicant proposes a linear extension of the left elevation roofline back toward the rear of the lot such that it covers the existing rear 3<sup>rd</sup> floor deck (see last page of plan set which presents existing and proposed elevations.) This results in creating a small amount of additional interior space in the ½ story.

#### Right side yard setback

The RB zone requires a right side yard setback of 8 feet. The existing right side yard setback is 3 feet. The Applicant proposes constructing a pitched, shed-style dormer whose length is less than 50% of the length of the roof plane to which it will be attached.

Page 3 of 6

Date: September 18, 2019 Case #: ZBA 2019-86 Site: 18 Glendale Avenue

Glendale Avenue is replete with similarly sized and designed 2 ½-story structures. Most of these structures present two-story front porches, with the first-story porch remaining open while the second-story porch is enclosed. Many of the houses along Glendale sport gable or shed dormers.

The extension of the left elevation roofline will be visible from the left-abutting property and adds a small amount of massing to the rear of the existing ½ story. The right elevation dormer will be visible from the right-abutting property, rear-abutting property, as well as from the public way.

Additional shading from the left elevation roofline extension and the right elevation dormer are anticipated to be minimal. Overall, the proposal is not inconsistent with the established character in the neighborhood.

There is not expected to be an impact to on-street parking as the total bedroom count on the property will remain the same. Abutters can expect typical noises and odors associated with the construction phase of a project.

Because this project will need to be reviewed by the Engineering Department prior to the granting of a building permit, they will determine if any measures need to be taken by the Applicant to address any impacts on the public sewer or water supply. Lastly, as the property is remaining a two-family, staff does not anticipate any change in traffic volume or congestion as a result of this project.

3. <u>Consistency with Purposes:</u> The Applicant has to ensure that the project "is consistent with (1) the general purposes of this Ordinance as set forth in Article 1, and (2) the purposes, provisions, and specific objectives applicable to the requested special permit which may be set forth elsewhere in this Ordinance, such as, but not limited to, those purposes at the beginning of the various Articles."

Staff finds that the proposal is consistent with the purposes of the RB zone which are "[t]o establish and preserve medium density neighborhoods of one-, two- and three-family homes, free from other uses except those which are both compatible with and convenient to the residents of such districts."

4. <u>Site and Area Compatibility:</u> The Applicant has to ensure that the project "(i)s designed in a manner that is compatible with the characteristics of the built and unbuilt surrounding area, including land uses."

Staff has addressed the question of site and area compatibility in a previous section.

5. <u>Housing Impact:</u> Will not create adverse impacts on the stock of existing affordable housing.

The proposal will not add to the existing stock of affordable housing.

#### 6. SomerVision:

The proposal will allow for the improvement of an existing property and will allow the future inhabitants of the structure to enjoy a more efficient interior arrangement. The permeability of the property will be improved with the removal of all bituminous material and an upgraded landscaping scheme.

Date: September 18, 2019 Case #: ZBA 2019-86 Site: 18 Glendale Avenue

# III. RECOMMENDATION

### **Special Permit under §4.4.1**

Based on the materials submitted by the Applicant, the above findings and subject to the following conditions, the Planning Staff recommends **CONDITIONAL APPROVAL** of the requested **SPECIAL PERMIT**.

The recommendation is based upon a technical analysis by Planning Staff of the application material based upon the required findings of the Somerville Zoning Ordinance, and is based only upon information submitted prior to the public hearing. This report may be revised or updated with new recommendations, findings and/or conditions based upon additional information provided to the Planning Staff during the public hearing process.
